Jim:

Subject: Contract HF-32-27 GFE and Termination Inventory

This letter supercedes our letters JF-P-166 of February 10, 1961, JF-P-178 of February 24, 1961, and JF-P-208 of April 27, 1961 on the above subject. Attached are the final inventory schedules in reproducible form with two copies which are based on the physical inventory of the items actually shipped to [REDACTED] on June 8. The only item which has not yet been shipped is Item 48 on Schedule 1 which must go separately under armed guard surveillance. We expect to ship this item prior to the end of June and will advise you when the system is shipped.

The schedules are made up to show the location of each item in the shipment according to the invoice number, which is also the box number. For example, Item 1 on Schedule 1 is located in Box A-2 and is Item No. 48 on Invoice No. A-2. Copies of these invoices (Packing Tickets) are enclosed for your use.

The result of this inventory shows a shortage as follows:

Item	Description	Quantity	Value
3	LAK-9 P/N 157-1116	1	\$ 25.00
27	"H" Mirror P/N 155-0008	1	500.00
28	"I" Mirror P/N 155-0009	1	500.00
34	Elbow Mirror P/N 155-1012	1	200.00
40	Field Barrel Group 157-1123	1	50.00
59	Blanks for Scanning Mirror	4	1,600.00
Total			\$2,875.00

The values given above were estimated, based on identical parts here. In our opinion, Items 3, 27, and 28 were probably broken during processing and scrapped. We believe Items 34 and 40 were modified during the course of the work on the contract and scrapped. The scanning blanks we are unable to locate; however, we believe a possibility exists that there was confusion when the original GFE inventory was taken and that these blanks were perhaps counted twice, once as scanning blanks and once as G & H window blanks. We certify that they have not been charged to the Government through other contracts and that if we are able to locate them we will so notify you.
